WORK EXPERIENCE

Security Researcher

Yogosha

12/2023 - Present

37, Rue des Mathurins 75008 PARIS

Achievements

- Conducting Web, Mobile and API vulnerability testing
- Secured over 20 companies
- Ranked in the top 30 in Q1 2024 for identifying vulnerabilities.
- Semi Finalist - Hunters Survival Game 2024

Support Engineer (Remote)

One Ummah BD

05/2022 - Present

Uttara, Dhaka 1230

Achievements/Tasks

- Integrated robust security measures to ensure compliance with industry standards and best practices
- Architect solutions with Windows and Linux servers, improving system efficiency and reduce costing by 30%
- Automated internal operations using micro-architecture, reducing redundancy by 45%.

PERSONAL PROJECTS

ProjectDisclosed (03/2024)

- Its aimed to help new bug hunters manage and organize **HackerOne** disclosed reports. It offers features like tracking read/unread status, categorizing by (**CWE**) and severity levels.
- <https://github.com/0xh7ml/projectdisclosed>.

ReviPLook (12/2018)

- CLI-based tool for retrieving reverse IP addresses using the HackerTarget API. Its goal is to assist security researchers in finding the reverse IP address of a targeted host.
- <https://github.com/0xh7ml/reviplook>.

EDUCATION

Computer Science & Engineering (CSE)

International University of Business & Agriculture

08/2022 - Present

Completed Courses

- Programming with C, C++ & PHP
- DBMS with MySQL & PostgreSQL
- Fundamental Networking
- Data Structure & Algorithm

SKILLS

Assessment Methodologies

AWS

Python

Web Application Penetration Testing

Docker

Host & Networking Penetration Testing

Bash

Host & Networking Auditing

API Penetration Testing

Cloud Penetration Testing

Windows Server

Git

ACHIEVEMENTS & AWARDS

Regional Champion, National Python Programming Contest (07/2019)

Won the Regional Championship in the National Python Programming Contest hosted by NCYPC, showcasing exceptional proficiency in Python programming.

2nd Runner-Up, BugHunt 2023 (Powered by HackerOne) (02/2023)

Achieved 2nd Runner-Up position in BugHunt 2023, demonstrating advanced skills in identifying and reporting security vulnerabilities in live hacking competition.

Acknowledged by Bangladesh Association of Software and Information Services (BASIS) (01/2021)

I've discovered a P2 severity security vulnerability & suggested the proper measurement to mitigate.
